AI Automation Architect | Marketing Automation Architect | AI Integration Strategist | HubSpot Certified | Remote

AI Systems Architect and Marketing Automation leader with 25+ years designing revenue systems that connect CRM platforms, AI, automation, and human teams. I design and deploy production AI—from voice agents and multi-agent workflows to lifecycle marketing and enterprise workflow automation—that delivers measurable business outcomes. Recent work centers on the LangChain ecosystem (LangChain, LangGraph, and LangSmith) alongside HubSpot, n8n, and modern AI platforms to build scalable, observable enterprise AI systems. Framework-agnostic by design: the system and the result come first; the technology follows.
